

Colours Quiz

Choose from the following words, characteristics that are MOST like you and LEAST like you.

Working horizontally put numbers "4" MOST then "3", "2" and finally "1" as the LEAST characteristic trait. Each line must have only one entry of each number.

Total each column by adding the numbers vertically. Transfer the 1st column total to the 1st column of the chart at the bottom of the page and so on. If you get a number between say 38 and 40 (39) place it between the two numbers.

You will end up with 4 points which you should then link up a line drawn directly from point to point.

E.g.
